# ABSTRACT OF THE DISCLOSURE

A method of producing a package wrapper. The method comprises the steps of: displaying an image in a display area of an imaging device; providing

5    a window which is movable relative to the image to produce a windowed image comprised of at least a portion of the image; providing a plurality of prestored patterns, each of the plurality of prestored patterns having at least one predetermined location wherein the windowed image may be placed; selecting one of the plurality of prestored patterns; combining the selected one of the

10   plurality of prestored patterns and the windowed image to form a package wrapper, the windowed image being located at the at least one predetermined location; selecting a package wrapper size; and printing, displaying, transmitting, or storing the package wrapper.
